

Air energy storage sales plan template

Why do energy storage companies need a business model?

Operating energy storage technologies and providing the associated services gives them a unique position in the industry once more. To succeed, however, they need to own, operate and experiment with energy storage assets and design the business models of the future.

Is energy storage a new business opportunity?

With the rise of intermittent renewables, energy storage is needed to maintain balance between demand and supply. With a changing role for storage in the energy system, new business opportunities for energy storage will arise and players are preparing to seize these new business opportunities.

What are the business models for large energy storage systems?

The business models for large energy storage systems like PHS and CAES are changing. Their role is traditionally to support the energy system, where large amounts of baseload capacity cannot deliver enough flexibility to respond to changes in demand during the day.

Can energy storage disrupt business models?

Energy storage has the potential to disrupt business models. Energy storage has been around for a long time. Alessandro Volta invented the battery in 1800. Even earlier, in 1749, Benjamin Franklin had conducted the first experiments. And the first pumped hydro storage facilities (PHS) were built in Italy and Switzerland in 1890.

Will energy storage become a new business line?

Energy storage will become a new business line in the energy world. The energy transition is changing the energy landscape. New players have entered the industry, operating renewable energy generation capacity, while taking away sales from traditional utilities. Consumers have started to produce energy themselves, leading to lower demand.

How will storage solutions impact the energy industry?

Storage solutions will create new connections between power generation and energy users, and between producing/consuming players ('prosumers') as well. Trading and arbitrage over time will create new business opportunities for the existing and new players in the energy field. However, we are not there yet.
