Can bricks be used as energy storage devices?

Now,chemists have discovered new potential in these ubiquitous building blocks: Through a series of reactions,scientists have shown that conventional bricks can be transformed into energy storage devicespowerful enough to turn on LED lights. The findings were published Tuesday in the scientific journal Nature Communications.

Are energy-storing bricks a smart fabric?

Vibha Kalra, a chemical and biomolecular engineer at Drexel University, likens the concept of the energy-storing bricks to smart fabrics where devices are embedded into wearable materials. "There is merit in integrating energy storage and smart devices into commonly used systems and materials, saving the extra volume or weight," she says.

Could a red fired brick be a potential energy storage solution?

Potential solutions have been suggested in many forms,including massive battery banks,fast-spinning flywheels,and underground vaults of air. Now a team of researchers say a classic construction material--the red fired brick--could be a contenderin the quest for energy storage.

Are energy-storing bricks worth the cost?

The energy-storing bricks are strong enough to be made into decorative,but not load-bearing,walls,D'Arcy says. A coated brick costs three times the standard price of a brick,which is 65 cents. But D'Arcy says scaling up the process should bring down the cost.

Could bricks be a green energy solution?

Still,scientists see potential in the bricks as a possible green energy solution. Whether it's massive "farms" of solar panels or home rooftop installations,solar power continues to grow rapidly as an affordable and clean energy source. But storing the power from the sun when it's not shining is one of its challenges.

How do bricks store electricity?

To allow the bricks to store electricity,the researchers pumped a series of gases through the maze of pores inside the brick. The gases react with the brick's chemical components,coating them with a web of plastic nanofiber known as a PEDOT,which is a good conductor of electricity,he said.
