The Building Technologies Office (BTO) hosted a workshop, Priorities and Pathways to Widespread Deployment of Thermal Energy Storage in Buildings on May 11-12, 2021. It was focused on the goal of advancing thermal energy storage (TES) solutions for buildings. Participants included leaders from industry, academia, and government.

EnergyPlus is a console-based program that reads input and writes output to text files. It ships with a number of utilities including IDF-Editor for creating input files using a simple spreadsheet-like interface, EP-Launch for managing input and output files and performing batch simulations, and EP-Compare for graphically comparing the results of two or more simulations.

China's 2023 Space Station Plans to Disrupt Space Industry. With 2022 coming to an end, China is close to concluding all of their plans for the year and calling it a day before preparing for 2023.

In this context, urban energy systems modelling is fundamental in helping megacities to plan and program the steps to meet the sustainable development goals [3]. Urban energy systems are the combined processes of acquiring and using energy to meet the energy demands of cities inhabitants [4]. The technical literature is rich of studies that analyze national ...

For the efficient operation the solar energy systems are required Thermal Energy Storage technologies (TES) for storing excess solar energy received on sunny days for use on cloudy days or at ...

Termed Lift Energy Storage Technology (LEST), elevators in high-rise buildings transform into dynamic storage units by lifting wet sand containers to store energy during idle moments. A ...

Where (\overline{C}_p) is the average specific heat of the storage material within the temperature range. Note that constant values of density ρ (kg.m^{-3}) are considered for the majority of storage materials applied in buildings. For packed bed or porous medium used for thermal energy storage, however, the porosity of the material should also be taken into account.

In this study, a new type of shaped energy storage phosphorus building aggregate was developed, and the feasibility of its application in ES-LAC was evaluated from the micro- and macro-performance perspectives. However, the study did not consider the actual model of temperature when determining the energy saving effect of ES-LAC for board and ...

The view of Cairo from the air is one of concrete buildings and tangled overpasses stretching as far as the eye can see. Green areas comprise less than four percent of the total urban built area, and recent construction projects have resulted in the destruction of tens of acres of the city's already-sparse green space. In megacities such as Cairo and Dhaka, ...
