Toroidal inductors. The prior discussion assumed m filled all space. If m is restricted to the interior of a solenoid, L is diminished significantly, but coils wound on a high-m toroid, a donut-shaped structure as illustrated in Figure 3.2.3(b), yield the full benefit of high values for m.Typical values of m are ~5000 to 180,000 for iron, and up to ~10 6 for special ...
