This is related to my other thread: house-battery-and-energy-management, but it's kind of a half-baked idea, so I'm doing it as a separate thread. Not sure when it happened, but I seem to have become an EG4 fanboy. I independently settled on the PowerPro battery, and the 18kpv inverter, and I'm considering getting the Chargeverter so I can charge the battery ...

AC BESSs comprise a lithium-ion battery module, inverters/chargers, and a battery management system (BMS). These compact units are easy to install and a popular choice for upgrading energy systems and the systems are used for grid-connected sites as the inverters tend not to be powerful enough to run off-grid.. It's worth noting that because both the solar ...
