Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.

H.E. the Minister of State for Energy Affairs Visits North Field Expansion Project Doha - Qatar - 01 March 2023 His Excellency Mr. Saad Sherida Al-Kaabi, the Minister of State for Energy Affairs, and Chairman of the Qatargas Board of Directors, recently toured a number of sites related to the North Field Expansion Project.

Lusail's urban connectivity and landscaping form a cohesive system to minimise congestion and pressures on Doha's transport infrastructure, utilise energy efficiently, shorten travel distances through mixed-use developments, and reduce contamination of the city's waterways while preventing associated risks and pollution.
