

Which energy storage technology has the most installed capacity in MENA?

Pumped hydro storage (PHS) has the largest share of installed capacity in MENA at 55%, as compared to a global share of 90%. Pumped hydro storage is one of the oldest energy storage technologies, which explains its dominance in the global ESS market.

How do Mena utilities deal with the SBM inefficiency?

To rectify the inefficiencies of the SBM, many MENA utilities have considered privatization or public-private participation through unbundling electricity utilities into distinct generation and distribution companies, while maintaining the transmission network as a separate utility managed by a Transmission System Operator (TSO).

How to choose a technology for energy storage?

For energy storage, in addition to the stored electricity, the values accrued from stacked services such as spinning reserves, frequency regulation, and energy arbitrage are major criteria in the selection of technology and its applications.
