Where are RV batteries stored?

Mostly, the batteries are kept inside a RV battery bank that can keep multiple batteries. This provision is given so that you can connect the batteries in series, like connecting 2 batteries of 6 V to get the total 12 V. Your RV battery could be in the exterior or interior compartment. It could also be at the entry-steps which can be retracted.

What are RV batteries?

RV batteries are essentially any batteries that are compatible with the electrical systems of an RV and able to meet the needs of the recreational vehicle's owner. RV batteries are often called "house batteries". All RV batteries are "deep cycle" batteries, capable of being drawn down to nearly nothing before being fully charged again.

How to store a battery in a trailer or RV?

Store the batteries inside storage area or your garage. If its heated one with better warm temperature then very well. A battery may freeze with lower temperatures and thus make sure its warm where its stored. 2. Keeping the Battery inside your trailer or RV could be bad. 3. Make sure the battery isn't kept on a direct concrete floor.
