Long-duration energy storage (LDES) is the linchpin of the energy transition, and ESS batteries are purpose-built to enable decarbonization. As the first commercial manufacturer of iron flow battery technology, ESS is delivering safe, sustainable, and flexible LDES around the world.

IDTechEx Research Article: Heating and cooling accounts for approximately 50% of global energy consumption, with 30% of this consumption represented by heating demand from industry. Given that the great majority of industrial heating processes use fossil fuels to generate heat, this has caused industrial heating processes to be responsible for ~25% of ...

Due to the rising demand for industrial energy storage technologies, you can easily find industries that embrace this new tech. Such companies leverage the benefits of industrial energy storage and produce more energy at a lower cost. A good example of such companies is Google. Notably, industrial energy storage is one of Google's best ...

The Industrial Energy Storage Systems Prize offers a total prize pool of \$4.8 million in cash across three phases. Phase 1: Design. Competitors present a cost-effective concept that has the potential to support industrial-level load storage for thermal or electric energy needs that increase the energy efficiency of the U.S. industry.
