

L888 movement energy storage

Conquest 39mm with L888 movement. Highly legible, very accurate, built like a tank but still manages to be a little dressy. The worst thing about it is the lume which is a bit disappointing.

As is the case with the rest of the self-winding HydroConquests, these two newbies will feature Longines' impressive Calibre L888 movement, which benefits from 64-hours of power reserve and a silicon balance spring. First impressions

above was from new.

I'm aware of 3 versions of the L888. L888.2 is the oldest, which is basically a 2892A2 with redesigned automatic works, lower beat rate (3.5Hz), and 65 hour power reserve, but still has the Nivarox balance spring. L888.4 is an updated version with silicon balance, 72 hour power reserve, and COSC chronometer certification.

Longines HydroConquest Automatik-Kaliber L888.2. Die im Jahre 2018 neu aufgelegte Longines HydroConquest hat, neben der Keramiklünette, auch noch ein neues Automatik-Kaliber spendiert bekommen: Das Werk mit der internen Bezeichnung L888.2 ersetzt das altbekannte ETA 2824 (Longines-interne Bezeichnung: L633). Die Basis für das ...

L888.3 I could not find any information, but judging from the movement pictures it's likely slightly modified L888.2 (do not quote me on this). L888.4 has silicon balance spring with COSC certification, as well as increasing the power reserve to 72 hours (presumably by using thinner mainspring / reducing mainspring barrel wall thickness?)
