

New York state plans energy storage

Will New York expand energy storage?

Expanding the State's energy storage goal is expected to have an average electricity bill impact for New York customers of less than half a percent, or approximately \$0.46 per month. The Roadmap is available for public comment on the Department of Public Service's website, with a subsequent decision-making expected in 2023.

What is New York state's energy storage goal?

This Order formally expands the State's goal to 6,000 Megawatts of energy storage to be installed by 2030, and authorized funds for NYSEERDA to support 200 Megawatts of new residential-scale solar, 1,500 Megawatts of new commercial and community-scale energy storage, and 3,000 Megawatts of new large-scale storage.

What is New York's energy storage roadmap?

The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the State and bolster grid reliability and customer resilience.

How much energy storage does New York have in 2024?

As of April 1, 2024, New York has awarded about \$200 million to support approximately 396 megawatts of operating energy storage in the state. There are more than 581 megawatts of additional energy storage under contract with the State and moving towards commercial operation.

How many megawatts of energy storage are there in New York?

As of November 2022, New York has awarded over \$500 million to support approximately 130 megawatts of operating energy storage in the state. There are more than 1,300 megawatts of additional energy storage under contract with the State and moving towards commercial operation.

Are energy storage systems regulated in New York?

Energy storage technologies and systems are regulated at the federal, state, and local levels, and must undergo rigorous safety testing to be authorized for installation in New York. You can download NYSEERDA's New York State [PDF] and New York City [PDF] factsheets to learn more about energy storage regulations and safety in your community.

Governor Kathy Hochul today announced a new framework for the State to achieve a nation-leading six gigawatts of energy storage by 2030, which represents at least 20 percent of the peak electricity load of New York ...

A 110MW/440MWh battery storage project in New York has been given the green light by regulators, ahead of the launch of tenders which could create a significant market opportunity in the state. The New York State Public Service Commission (PSC) gave its approval earlier this month for the battery energy storage system
