The two battery storage facilities installed in Tonga are complementary: the aim of the first 5 MWh / 10 MW battery is to improve the electricity grid's stability (regulating the voltage and frequency), while the second 23 MWh / 7 MW battery is designed to transfer the electrical load in order to help the grid supply electricity at peak times, and notably in the evening.

Electric storage heating is the best price-sensitive heating solution on the market. By itself, it is a complete heating system, providing heat 24 hours but using energy at low-rate prices. However, these units can also be installed in conjunction with other heating solutions or as an add-on to an existing heat source in the house.
