Energy Policies Panama is a Central American country with an ever-expanding electrical grid. The current installed capacity of around 3386 MW as of 2017 with the majority of this capacity coming from hydroelectric dams [].The current energy policies in place are working to help set a plan for long-term energy development and to reach these goals by 2050 [].

To address these challenges, Panama's National Energy Plan 2015-2050 has started moving the energy sector decisively towards a more diverse energy mix that takes full advantage of the country's significant renewable energy resource potential. At the core of the plan is a massive scale-up of solar photovoltaic and wind energy.
