What if the EPC service provider provides the owner?

The EPC service provider has provided the Owner o Total number of testing hours with irradiance above with the initial or minimum stock of spare parts, as a certain threshold (e.g., 500W/m2 for at least 20 defined in the contract (see also section 10.6. Setup hours in a 15-day period). of strategic spare parts warehouse).

How to select EPC projects?

5.1. Selection of EPC projects To select EPC projects and assess their quality, investors and lenders scrutinise certain factors, which often condense into checklists and internal guidelines (also called "ex-ante KPIs"). The content of this support strongly depends on several stakeholder traits (strategy, experience, etc.).

What makes a good EPC service provider?

Clear and effective communication between the Asset Owner, the EPC service provider and other service providers (and in general, all third parties involved in the project), and constant monitoring of the construction work progress according to the WBS, are key to ensuring full alignment on scope of work, objectives, deliverables, and timing.

What are EPC project performance KPIs?

Selection of EPC projects and section 5.2. Selection of EPC service provider. Project performance KPIs help all stakeholders to track project progress, and EPC service providers to optimise their processes. Ex-post KPIs deliver a final assessment on a built project.

What documentation should a project developer hand over to EPC service provider?

5.3. Handover from project developer to EPC service provider At the contracting stage, when selecting or appointing an EPC service provider, the developer should hand over all the important documentation about the project and preliminary works (see Annex F, section Basic Design - Development Documentation).

What documentation should an EPC service provider include?

If an EPC service provider has already been involved in the design phase, the set of documentation shall include the projects' buildings, amenities, preliminary studies, quality and testing plans, as well as the method statement, in addition to the layout and equipment specification.
