What is the UK's energy storage Investment Support Scheme?

Credit: David Pimborough /Shutterstock. The government of the UK has launched a new investment support scheme aimed at bolstering the country's energy storage infrastructure. The initiative aims to encourage the development of long-duration energy storage(LDES) facilities,which have not seen significant investment in nearly four decades.

Are energy storage systems expensive?

Despite the decrease in the energy storage system (ESS) cost,ESS remains expensive,and the upfront investment required is difficult to overcome without government support. The United Kingdom energy storage systems market is segmented by type and application.

Is ENGIE the UK's first solar-plus-storage off-take agreement?

Meanwhile,in July last year,in what was described as the UK's first solar-plus-storage off-take agreement,Engiesigned a 10-year hybrid power purchase agreement (PPA) with DIF Capital Partners and ib vogt for a co-located 55MW solar and a 40MW /80 MWh battery storage system in Leighton Buzzard in Bedfordshire in the UK.

Should energy storage developers have a revenue cap?

Under the so-called cap and floor regime -- already used for electricity interconnectors -- energy storage developers will be guaranteed minimum revenues. That will ensure companies can at least make debt repayments,but a revenue cap means they must share profits above a certain level. Have a confidential tip for our reporters? Get in Touch
