Will Chevron be able to produce crude oil in Venezuela?

Much of Venezuela's crude oil production capacity and infrastructure have suffered from a decade-long lack of capital and regular maintenance. Chevron's earlier exemption increased its production to 135,000 barrels per day (b/d) in 2023, and we expect Chevron's output in Venezuela to reach 200,000 b/d by the end of 2024.

Does Venezuela trade liquefied natural gas (LNG)?

Venezuela does not participate in liquefied natural gas (LNG) trade; however, the government plans to expand offshore natural gas production and to export it as LNG.

Will a new project increase Venezuela's production?

According to IPD Latin America, ventures operated by ENI, Repsol, and Maurel & Prom could increase production by an additional 50,000 b/d in the near term. As a result, we estimate that these projects will increase Venezuela's total output to around 900,000 b/d by the end of 2024.⁷
