

Zambia outdoor energy storage program tender

How does Zambia support solar?

The country has been supporting solar through the Scaling Solar program and the Zambian REFiT Strategy, which is an initiative developed with the support of Germany's KfW Development Bank. The Zambian government aims to deploy 500 MW of solar PV by 2023, in order to ease chronic power shortages.

Can battery storage be used with solar photovoltaics in Zambia?

The Zambian regulation foresees customs duty and VAT exemptions for most equipment used in renewable energy or battery storage projects. Detailed information is provided in In this section, we discuss the opportunity of battery storage in combination with solar photovoltaics from a financial point of view.

Why should German and European service providers invest in Zambia?

For German and European service providers active in the energy sector, Zambia presents significant potential for business development. There are clear needs across the solar energy and storage value chain, including project development and financing, equipment manufacturing, system integration and contracting.

What will Zambia's energy demand look like in 2040?

The government anticipates that peak demand will be at 8,000 MW by 2030 and 10,000 MW by 2040 (from around 3,000 MW in 2022). It also projects that the demand will be largely driven by mining and agricultural consumers and not residential consumers as projected in the COSS (Government of Zambia, 2022). 4. Zambia's renewable energy landscape

How much does storage cost in Zambia?

Zambia, between USD 500/kWh and USD 1,000/kWh. With 3,650 kWh stored during the lifetime of the system, we can compute a cost of storage of USD 0.14/kWh and USD 0.27/kWh.

Will the demand for power continue to rise in Zambia?

While the Zambian government accepts that the demand for power will continue to rise in Zambia, it has taken the view that the demand will be much higher than the 95% projected under the COSS.

Background. The Long Duration Energy Storage (LDES) program has been allocated over \$270 million to invest in demonstration and deployment of non-lithium-ion long duration energy storage technologies across California, paving the way for opportunities to foster a diverse portfolio of energy storage technologies that will contribute to a safe and reliable ...
